

-=Oil Filter=-

Use which ever settings gives you the best results for small objects.

If Changing Filament Colour,, do it at "Each end of the Oil Filter Section" or use the 3 part file-

Main Filter hole is 3.4mm- attach to engine by Glue or a 45mm M3 Bolt, drill a 2mm hole into Engine Block and screw in,,

I had eyeball the scale of Oil Filter the using photos of the real engine,, it looks about right but is not prefect-

-=Mindless=-
