

## Build instructions for Vibro Battle Axes

### 3D Printing

The next tables show the stl files you need to print. It gives the advised print layer height, and the material color. You can print the main parts in any color, and paint them white for instance.

Depending on your printer and your preference you can select the version you want.

There are different scales available for this kit, and each file has 2 different formats.

	vibro_Battle_Axe_2		0.04	Resin

### Cleaning

Before assembly please clean the parts with an exacto knife, because they have been 3D printed with a brim.

After this sand the area's where you can see build layers. Also sand the flat area's that need to be glued together. Use 400 sandpaper in the final step to smooth out the build layers. You can also use a filler primer to do this and sand afterwards.

## Painting

The picture below shows the colors used like in the Mandalorian series.

Part	Part name	Remark
	Vibro Battle Axes	Paint light gray

## Disclaimer on 3D printed parts

**3D Printed Parts are not like Injection Molded Parts. The surface will show extrusion rings, artifacts, blemishes and other signs of plastic extrusion. This will occur with any 3D Printed parts. Also due to the printing process, parts can have different tolerances from the original size in the digital file. Especially between FDM and SLA prints. This in no way deters from the parts functionality. All parts are inspected prior to shipment.**
