

## Build instructions for The Vibro Staff and knife

### General description

QueeQueg is a rugged skiff guard from *Return of the Jedi*, wielding a staff and a sheathed knife, dressed in tattered, layered armour. His fierce appearance and battle-ready stance make him a formidable enforcer in Jabba the Hutt's service.

### 3D Printing

The next tables show the stl files you need to print. It gives the advised print layer height, and the material color. You can print the main parts in any color, and paint them white for instance.

Depending on your printer and your preference you can select the version you want.

There are different scales available for this kit, and each file has 2 different formats.

| Scale | Filename         | Extension |                                                                                                                                                                                                                                             |

## Cleaning

Before assembly please clean the parts with an exacto knife, because they have been 3D printed with a brim.

After this sand the area's where you can see build layers. Also sand the flat area's that need to be glued together. Use 400 sandpaper in the final step to smooth out the build layers. You can also use a filler primer to do this and sand afterwards.

## Painting

The picture below shows the colors used like in the Mandalorian series.

| Part                                                                             | Part name             | Remark                                  |
|----------------------------------------------------------------------------------|-----------------------|-----------------------------------------|
|  | Vibro Staff and knife | Paint light gray, or any color you like |

## Disclaimer

I don't own any copyrights/trademarks etc for Star Wars, the Mandalorian, The book of Boba Fett, Obi-Wan or the Battlefront, or anything else associated with the Lucas Film. No violation or infringement is intended, this is purely a work of fan art in appreciation of a great show and a design

## Disclaimer on 3D printed parts

**3D Printed Parts are not like Injection Molded Parts.** The surface will show extrusion rings, artifacts, blemishes and other signs of plastic extrusion. This will occur with any 3D Printed parts. Also due to the printing process, parts can have different tolerances from the original size in the digital file. Especially between FDM and SLA prints. This in no way deters from the parts functionality. All parts are inspected prior to shipment.

## License

Digital files from MassassiModels have a strict non-commercial, personal use only license. You shall not share, sub-license, sell, rent, host, transfer, or distribute in any way the digital or 3D printed versions of this object, nor any other derivative work of this object in its digital or physical format (including - but not limited to - remixes of this object, and hosting on other digital platforms). The objects may not be used in any way whatsoever in which you charge money, collect fees, or receive any form of remuneration.

You are encouraged to download objects, 3D print them, and spread the word. We spend dozens or sometimes even hundreds of hours these amazing objects for 3D printing. Please take the time to credit us when sharing our work.

You can find our social media handles below, if you want to credit us that way, otherwise you can share pictures of 3D prints, comments and messages directly from the object page.

Please share your work in progress or/and your finished model on my Facebook group:
